Catalogue of Beekeeping Equipment 2020

Welcome to Maisemore Apiaries Ltd

Honey House & Storage

Maisemore Apiaries began when Leo and Leslie Hiam started keeping bees as a hobby, when the Second World War began they had to go and help the war effort so the bees were left to their own devices, on their return they increased the number of bees and began to make beekeeping equipment.

Now Maisemore Apiaries is still a family run and owned business, looked after by Eric, Johnathan and Mark Hiam, we now have approx. 1000 hives of bees all in standard National hives around Hereford, Worcester and Gloucestershire, our hives are used for pollination of all fruits and arable crops and honey production.

We are based in Maisemore, Gloucester and are still working from some of the same buildings that Leo and Leslie worked in, we now supply all of the UK and Ireland and indeed all the world.

Our shop is full of all the beekeeping equipment that is practical and essential to beekeeping, we are open six days a week, normally with a beekeeper on hand to answer all your questions.

Opening Hours

Monday - Friday	9am - 5pm
Saturday (March to September)	9am - 1pm
Saturday (October - February)	CLOSED
Sunday & Bank Holidays	CLOSED

14th March - CLOSED for Beetrade Show
4th April - CLOSED for Harper Adams Convention

We will be closed for Christmas 2019 from 24th December 2019 to 2nd January 2020.

Purchase your Beekeeping Supplies Securely at Bees-Online.co.uk. Most major credit cards taken, with Thawte® 128 bit Encryption, your personal details are **SAFE & SECURE**.

Shop

The Environment

All the timber used in making our bee hives and hive parts come from sustainable forests around the world.

Wood waste is all recycled, saw dust and shavings are all bagged in our plant and used as bedding for pets and horses, timber off cuts are used as firewood.

We also now manufacture wooden briquettes for open fires, ovens, chimeneas, woodburning stoves and bbqs at an amazing price of **£3.50 per 10kg** when collected from our premises.

Last year we bought a machine for recycling cardboard, old cardboard boxes are collected from local shops and used as loose fill/packaging for all mail orders.

We cater for everyone from the smallest hobbyist to the serious professional

Books Zero Rated

Bees at the Bottom of the Garden by Alan Campion - an ideal book for those starting out in beekeeping, lots of advice and tips on how to look after your bees. **£8.95**

Guide to Bees and Honey by Ted Hooper - this book is more suited to the more advanced beekeeper. **£12.99**

Pocket Pollen Colour Guide - A handy guide to aid in the identification of pollen loads of the honey bee. **£1.02**

OUR RANGE OF HIVES

ASSEMBLED HIVES & HIVE PARTS - PLEASE CONTACT US TO BE ASSEMBLED PRIOR TO COLLECTION.

All the hives in our range are made from Western Red Cedar, one of the most beautiful woods in the world, light yet very durable, ideally suited to the UK weather, all the internal parts of the hive ie., the frames are made from Russian or Scandanavian unsorted redwood.

The National hive is the most widely used hive in the UK and is available in several options, you may decide you require a larger brood area than a standard brood chamber offers, you will then require a 14 x 12 brood chamber or possibly an open mesh floor instead of a solid floor, there is also the option of an 8" deep roof, hive stand or gabled roof to make your National hive to look more like a WBC.

All flat packed cedar hive parts come complete with assembly instructions.

The WBC hive is the one most children would draw when asked to draw a bee hive, there is an outer skin and inner skin which offers more protection from the elements but also makes it more time consuming to use, this hive can also be purchased with a 14 x 12 brood chamber or an open mesh floor.

All flat packed cedar hive parts come complete with assembly instructions.

Polystyrene Hives inc. VAT

ALL OUR POLYSTYRENES BEE HIVES AND HIVE PARTS ARE MADE HERE IN THE UK AND ARE OF 100G/LITRE AND ARE UP TO 3 TIMES STRONGER THAN POLYSTYRENE USED IN PACKAGING. WHEN PAINTED WITH SMOOTH MASONRY PAINT THESE POLYSTYRENE HIVES WILL LAST FOR 30+ YEARS.

Now in our 3rd generation of commercial bee farming and bee hive manufacturing Maisemore Apiaries have designed our own Polystyrene hive and hive parts made from a high density material which has good strength up to three times stronger than used for packaging.

They are lightweight, cheaper and durable and has excellent insulation properties to help keep the bees warm through winter.

Our polystyrene Brood Chambers and Supers have dovetail joints for easy assembling and do not require runners as they are built into the mould.

They come supplied flat packed with screws for assembling or ready assembled and if you want to glue them we recommend Copydex. They come shrinkwrapped and can be bought individually or as a complete hive.

They are compatible with all our wooden National hive parts, frames & accessories but you cannot use a wooden roof with the polystyrene.

They can be painted (outside only) with a masonry paint or just left as they are.

Assembly Instructions

Pic 1.

You can see the rounded edges at the top with the hand holes pointing out and down to disperse water.

Pic 2.

You can see the Poly frame runner which gives you space to pick up the frame and should be opposite each other when assembling.

Pic 3.

Behind the frame runner is a slot which will accept castellated frame spacers if required.

Caring for your Hive/Nucleus

Painting

If you want to paint your polystyrene hive, this will help prolong its life expectancy, but only paint the outside. We advise using smooth exterior masonry paint, we sell Santex Ultra Masonry paint in two colours, Sand Dune or Brick Red, but this can be bought from any DIY hardware store. When looked after, your polystyrene hive will last 20 years+.

Cleaning

For cleaning your polystyrene hive, we use and sell soda crystals, which is totally bio-degradeable and ideal for removing propolis and wax. Soda crystals are also great on hive tools, smokers, gloves and bee suits, but please take care and wear suitable gloves and clothing when using any cleaning product.

You must clean your hive of propolis and wax before steralisation. For steralisation, use a gentle bleach containing hypochlorite, which is required for steralisation against AFB.

Poly Nucleus & Nucleus Parts inc. VAT

A. National/Commercial Poly Six Frame Nucleus Slotted Steel Queen Excluder
galvanised slotted steel queen excluder will prevent the queen from moving to the brood chambers and supers

Each £6.24

B. National Poly Six Frame Nucleus (Option 1)(Empty)

includes Brood Chamber,
built-in Open Mesh Floor
Miller Style Feeder & Lid

A. 3 Frame with Chrome Cage
takes 3 frames of all sizes and comes complete with legs, has nylon gears and nylon tap and comes with a chrome cage. All frames tangential. **£388.50**

B. 4 frame with Stainless Steel Cage
this is the start of our extraction range, made completely of stainless steel so you do not have to worry about plastic barrels breaking and going brittle, sits on a table or a box, has a stainless steel cage, nylon cogs and nylon tap. Takes 4 shallow or 2 deep, all types of frames tangential. (Includes Lids) **£215.81**

C. 4 frame with legs with Stainless Steel Cage
same as B. but with legs can be bolted to the floor or to a pallet to stop the annoying wobble when extracting. Takes 4 shallow or 2 deep, all frames tangential. (Includes Lids) **£259.97**

D. 4 frame with filter & tank with Stainless Steel Cage
same as B. but comes with an integral filter and tank, the tank holds approx. 50kg of honey, so as you extract your honey drops through the holes in the bottom of the extractor, through the filter and into your tank ready for bucketing. Takes 4 shallow or 2 deep, all types of frames tangential. (Includes Lids) **£325.91**

E. 6 frame RADIAL (electric) extractor with Stainless Steel Cage
6 frame s/s electric radial extractor - will take 6 x sn4 frames, 6 x sn1 frames or 6 x bs manley shallow frames, also takes 3 x bs deep frames tangentially, cage & drum are stainless steel, comes complete with nylon honey tap & 2 plastic hinged see-through lids, also has a lid lock for safety & the speed of the motor is variable. (Includes Lids) **£792.10**

F. 28 Frame Electric Radial Honey Extractor
28 frame electric stainless steel honey extractor, will hold 28 BS shallow frames or 12 BS deep frames, it also accepts BS Manley frames, comes complete with sturdy red legs and two clear perspex lids. This honey extractor, like all our honey extractors, has a bottom with a particular shape, designed to completely empty the honey and welded with the TIG system. The MULTIFUNCTIONAL cage in laser-cut stainless steel is very important. The new "GAMMA2" motorization has a power of 100W and a faster acceleration ramp. The new safety cover locking device allows the cover to be opened at the moment when the cage stops, without waiting. 40 mm food grade plastic tap. **£1857.86**

NEW

COLLECTION ONLY

G. 6 frame RADIAL (manual) extractor with Stainless Steel Cage

6 frame radial extractor with legs, s/steel drum, s/steel cage, 2 clear plastic lids, will extract National and WBC shallow frames only to include Manley, SN4s, SN1s, SN2s and SN5s also takes 3 x bs deep frames tangentially. (Includes Lids)

£458.35

H. 3 Frame Acrylic Extractor with Stainless Steel Cage (Inc Lids) COLLECTION ONLY

This extractor has a clear acrylic body which allows you to see the honey leaving the frames when being extracted, will take all frames except 14x12, Dadant deep, Commercial deep and Langstroth Jumbo.

£257.50

I. 9 frame (manual) extractor with Resin Cage

9 frame radial extractor complete with tangential screens, able to take all types of shallow frames except Manley all types of deep frames can be extracted tangentially, has a stainless steel barrel and resin moulded cage, nylon tap, two piece see through lids and enamelled legs.

£399.47

J. 9 frame (manual) Manley extractor with Stainless Steel Cage

9 frame radial extractor complete with tangential screens, will accept 9 shallow Manley frames and all types of shallow frames and can be extracted tangentially, has a stainless steel barrel and stainless steel cage, nylon tap, two piece see through lids and enamelled legs. (Includes Lids)

£532.25

K. 9 frame (electric) extractor with Resin Cage

9 frame radial extractor complete with tangential screens, able to take all types of shallow frames except Manley frames and all types of deep frames can be extracted tangentially, has a stainless steel barrel and resin moulded cage, nylon tap, two piece see through lids and enamelled legs (variable speed motor). (Includes Lids)

£1373.50

L. "TWIN" honey extractor with bench-type uncapping machine

This "Compact unit" brings together in one unit, two most important pieces of equipment in honey processing: a bench-type uncapping machine and an electric honey extractor. With the start of production of the new BETA motor, which is mounted under the honey extractor, we can now offer this compact unit.

£2410.02

A. 2 frame plastic extractor

The extractor will fit two BS shallow or two Smith shallow frames, two BS Manley frames, two BS Deep or Smith deep frames, two Commercial shallow frames or two Commercial Manley shallow frames.

(Actual item may vary slightly from image)

£160.00

B. 9 frame (electric) Manley extractor with Stainless Steel Cage

9 frame extractor with 80 watt reversible motor, stainless steel drum and cage, red enamelled legs and nylon tap, will accept 9 Manley frames and all types of shallow frames, complete with clear perspex lid.

£989.18

C. 20 frame (electric) extractor

20 frame extractor with 80 watt reversible motor has a stainless steel drum and stainless steel cage, red enamelled legs, nylon honey tap complete with clear Perspex lid.

£1179.43

D. 2 frame plastic extractor bundle

Consisting of 2 frame plastic extractor + 60lb plastic honey tank and tap, uncapping roller, 3x 15lb plastic honey buckets & nylon double strainer

The extractor will fit two BS shallow or two Smith shallow frames, two BS Manley frames, two BS Deep or Smith deep frames, two Commercial shallow frames or two Commercial Manley shallow frames.

£171.00

E. Honey pump, electric single-phase motor 220 V

HONEY PUMP with stainless steel body and food-grade 90mm rotor, complete with two stainless steel fittings for plastic-reinforced 50mm pipes. Self priming, with a SINGLE-PHASE motor, 195 pm right or left rotation. Mounted on a two-wheeled barrow. NOTE: do not run the pump without honey or water.

£1430.42

F. SMART electronic dosing machine with rotating loader 625mm

New! SMART electronic dosing machine with rotating loader 625mm.

- Possibility of height adjustment
- Possibility of automatic and manual dosing adjustment
- Intuitive and easy to use touch screen
- Return of the drip cutter to avoid the fall of the honey
- Electronic sensor for the recognition of jars, both in glass and in plastic

£3747.23

weight: 20 kg

A. Dana Api Melter

Stainless steel construction with a double walled, insulated vat. Dana api melter has two separately controlled heating elements: One on the bottom and one at the top under the lid. It has a powerful fan built into the lid, which ensures an even and quick distribution of heat in the vat and a smooth extraction of honey from your cappings wax.

£3479.00

D. Spare Element & Lead for Uncapping Tray

£34.03

E. Uncapping Roller

Simple but ingenious method of uncapping, roll over the sealed comb, the spikes will penetrate the cappings to reveal the honey then simply extract.

£11.81

F. Honey Knife (Straight)

Our standard knife has a cranked handle with plain edges on both sides.

£27.09

B. DANA Api THERMA MELTER

is a thermostatically controlled stainless steel liquefier. This melter has been designed to melt honey in a gentle, yet efficient way. The melter is positioned on top of the crystallized honey in the container. After only a few hours of operation, the melter will have liquefied even heavily crystallized honey. You can also use the melter to keep your honey at a desired temperature for example before bottling. As you all know, it can sometimes be difficult to get all your honey bottled during the height of the honey season. With the Dana api Melter you can leave your honey unbottled over night without having to worry about undesirable crystallization.

Technical data: The melter works at 230V. The thermostat can be freely adjusted to any temperature between 30 degrees C and 85 degrees C or set to an anti-freeze position (F). 21 cm, 350W and the 28cm, 400W.

21cm - £367.60
28cm - £415.50

C. DANA Api Mini-CAPPINGS MELTER

is a round vat made of stainless steel with a perforated bottom insert. The DANA api Mini-CAPPINGS MELTER is equipped with a powerful heating element under the lid and a fan that ensures a quick and even heat distribution. With this system you will be able to recover honey from the cappings wax without destroying the fine quality and taste of your honey. In fact, this yummy gold will not only be good enough to eat it will be good enough to sell.

£1046.54

G. Honey Knife (Bent)

Our knife is bent on the end for those awkward places with a cranked handle and a blade which is serrated on both edges.

£28.80

H. Stand for Dana Api Mini Cappings Melter

for use with C above

£217.03

I. Stand for Dana Api Therma Melter

for use with B above

£56.24

J. Sump tank, stainless steel, double walled, 1300x515x300mm
SUMP TANK, entirely made from AISI 304 stainless steel, double-walled, designed to collect honey straight out of the extractor with immediate removal of coarse impurities. The interspace between the two walls contains water, which is heated by a thermostatically controlled resistance heater: honey is heated and made more fluid thus making cleaning operations easier. The inner bottom is inclined towards the honey gate to ensure complete discharge of the tank. The top part consists of a removable coarse strainer. The tank is equipped with 5 mobile vertical partitions, fitted according to an alternate high-low pattern to create a 'syphon' effect: while honey is fed through them it undergoes finer, progressive cleaning according to differences in specific gravity. The tank comes complete with a 50mm suction pipe to suck honey in by pumping.

£1373.41

K. S/Steel Steam Wax Extractor (XL)
stainless steel with Gas Burner suitable for reducing old frames, scrapings etc.

£742.62

L. Stand Support & Fine Filter Bag only (20 microns)

£21.55

M. Steam Wax Melter (Electric)
The wax melter can contain up to 15 brood frames or an equivalent number of supers or cappings. It enables to recover the wax without having to cut away the comb from the frame. The frame wire will remain intact allowing still good frames to be re-used.

£710.17

N. Small S/Steel Steam Wax Extractor with Steam Generator

Made completely of stainless steel. Size 18" x 9"

Place dirty wax and old comb into the basket, simply attach the steam generator to the wax extractor, fill generator with water and plug in, after a few minutes the wax extractor will become hot enough to start processing your dirty wax, cappings, old combs and alike.

PLEASE REMEMBER TO REFILL STEAM GENERATOR WHEN LEVEL GETS LOW.

£286.88

O. Large S/Steel Steam Wax Extractor with Steam Generator

Made completely of stainless steel. Size 25" x 12"

Place dirty wax and old comb into the basket, simply attach the steam generator to the wax extractor, fill generator with water and plug in, after a few minutes the wax extractor will become hot enough to start processing your dirty wax, cappings, old combs and alike.

PLEASE REMEMBER TO REFILL STEAM GENERATOR WHEN LEVEL GETS LOW.

£377.15

A. Plastic Honey Tap (40mm)
come with back nut and made of nylon.
£14.36

B. Metal Honey Tap (40mm)
comes with back nut and made in chrome plated brass.
£50.40

C. S/Steel Metal Honey Tap (40mm)
comes with back nut and made in stainless steel.
£69.20

D. Spare 'O' Rings (for Honey Taps)
face seal or back seal
£0.87

E. Conical Tap Strainer
made in stainless steel with coarse strainer.
£30.95

F. S/Steel Double Slide Strainer
approximately 9" in diameter with adjustable arms.
£25.75

G. Nylon Double Strainer
a very popular and inexpensive alternative to the stainless steel double slide strainer made in food grade plastic.
£13.46

H. Coarse Heather Nylon Filter Bag - 250 micron
36cm (H) x 24cm (dia) approx
for straining honey
£28.67

I. Nylon Filter Bag - 275 micron
for straining honey
£20.79

J. Stainless Steel Mixer for Creaming Honey
used in a suitable heavy duty drill for creaming or blending honey, shaft diameter 10mm
Spiral £23.26
Standard £29.20

K. Honey Refractometer
an optical instrument that measures the exact water content in honey complete with case, cleaning cloth, cleaning fluid and screwdriver.
£87.19

L. Conical Filter Bag
Available in fine or superfine for straining honey
each
£7.65

M. Butter Muslin
approx sq metre for straining honey.
£4.67

N. Honey/Wax Separator
A stainless steel bucket which is placed under the uncapping tray outlet, as the honey cools the wax floats on top of the honey, honey can now be poured from the spout.
£99.98

O. Electric Uncapping Knife
a very light and slender tool, a joy to work with, the best we have come across.
£135.79

P. Honey/Heather Press
all metal construction with stainless steel basket.

£503.86

Q. Thermostatically Controlled Warming Cabinet
a more accurate way of controlling the temperature of your honey when bringing it back to liquid for bottling, includes a temperature indicator strip which glows when the cabinet reaches the correct temperature

£264.12

R. Plastic Honey Tank with Tap & Lid
these food grade plastic honey tanks will hold approx 27kg, 40kg or 80kg of honey, comes supplied with a nylon honey tap and back nut.

13½kg (30lb)

£19.27

27kg (60lb)

£21.41

40kg (88lb)

£29.62

80kg (176lb)

£46.81

S. DIY Thermostat Kit
this kit is exactly the same as what goes into our thermostatically controlled warming cabinet, comes with instructions on how to fit.

£100.01

T. Groschopp 80 Watt Electric Motor Conversion Kit
80 watt electric reversible motor complete with mounting plate and coupling suitable for all extractors up to and including a 15 frame.

£437.30

U. Handheld Heather Honey Loosener
The only efficient tool to get Heather Honey out of the combs. A hand held tool with small spring loaded plastic needles that are pushed into the cells to agitate and stir the honey so it loosens up and can be forced out during the extracting process.

£144.43

Large Heather Honey Loosener £P.O.A.

A. Apiguard

thymol based treatment for varroa control, comes in a box of 10 trays which is enough for 5 hives.

per box £26.98

B. Dulcofruct Apivirool

Administration is made by spraying it directly on the bees found on the frames, without adding sugar syrup.

1kg Bottle £6.90

C. Apiguard Eke

a small extension suitable to go on top of a national brood chamber to provide extra room for apiguard and candy.

cedar flat £8.21

cedar made up £12.65

D. Api Life Var

is the organic solution for the treatment & prophylaxis in the fight against varroasis in bees & against tracheal mites. Works by contact & suffocation from vapours of essential oils, parasite will detach & fall from body of the bee. Totally safe. Treatment requires 4 bars (2 packs).

2 bars per pack £3.41

E. Apistan

treatment for varroa control, comes in a pack of 10 strips, 2 strips per hive, enough to treat 5 hives.

per pack £25.29

F. BeeVital VarroMed 555ml

VarroMed is a ready-to-use product based on a combination of natural components with the active ingredients oxalic acid and formic acid. This combination leads to increased efficacy against Varroa mites and to a better tolerance by the bees.

The new product has been scientifically tested in the most extensive field studies with locations all over Europe with Madrid representing Continental, Maritime and Mediterranean climates. Spring, Autumn and Winter tests for climate zone each climate zone were undertaken to prove the excellent efficacy of the product. The result is a product that can be used at any critical moment through the beekeeping year and in the Varroa life-cycle. This makes VarroMed ideal for use in integrated pest management (IPM).

VarroMed is an easy to use liquid formulation that is directly applied onto the bees simplifying Varroa treatment. For the distribution in the colony VarroMed makes use of the bees own hygienic instinct - the grooming behaviour.

Due to the nature of the ingredients VarroMed does not pose any risks to the honey production. In fact, this is reflected in the zero-day-withdrawal period of VarroMed approved by the EMA.

This Product can only be supplied to customers in the U.K.

555ml £33.50

G. Thymol Crystals

treatment for the control of varroa, acarine and chalk brood, used as an anti-fungicide in syrup feeds.

L. Api-Bioxal

Api Bioxal is the new Veterinary Medicine against the Varroa mite.

35g sachet treats 10 hives £12.37

M. Oxalic Acid Tablets

for use with the oxalic acid vapouriser.

150g (100 x 1.5g) £8.24
750g (500 x 1.5g) £28.22

N. Syringe

ideal for the use of oxalic acid. £2.03

O. Vitafeed NUTRI

A new feed for honey bees from honey bee health specialist Vita (Europe) Ltd will help boost colony health and increase honey production. Vitafeed Nutri is a rigorously tested, GMO-free nutritional supplement that can be used at almost any time of year to promote controlled colony growth. Packed with easily digestible proteins, Vitafeed Nutri can make up for nutritional deficiencies in honey bees' diet, thereby stimulating egg-laying, extending lifespan and ultimately increasing honey production.
500g £25.99

P. Oxalic Acid Vaporiser

Push the silver end into the front of the hive with two oxalic acid tablets on top, connect the two clips to the car battery, this will then vapourise the two tablets into the hive, this method can be used at temperatures as low as -10°C with very little mortality rates compared to the trickle method. £146.06

Q. Oxalic Acid Crystals

ideal to use in the vapouriser.

300g pot £4.54
1kg pot £9.07

A. Sfera Hornet & Wasp Trap™

An ingenious device for attracting and killing various kind of flying pests: midges, mosquitos, common flies, fruit flies, olive flies, wasps, hornets, *Vespa velutina* (Asian hornet) lepidoptera, etc.

NB: do not use on flowering plants.

Sfera Trap™ can be used in all environments, both inside and outside.

Beside its yellow color - which attracts flying pests during the day - it possesses a feature that makes it unique of its kind: a LED light that attracts flying pests at night. The LED luminaire is powered by two AA batteries (not provided) which have a life of about one month.

Indoor, Sfera Trap™ prevents flying pest infestations in barns, stables, milking rooms, greenhouses, grain and food warehouses, etc... Outdoor, Sfera Trap™ is very effective in catching flying pests in orchard, olive groves, vineyard, gardens, campsites, country houses, etc.

Sfera Trap™ consists of two hemispheres, one of which with the latching ring. Both hemispheres are fitted with a luminaire seat, to allow for the choice of the position of the light - from above or below.

SFERA TRAP

After inserting the two 1.5V AA batteries (not included), insert the luminaire into its seat inside one of the semispheres. Sfera Trap is now ready to be assembled -

How to do it

Before applying the glue, wrap the sphere with a transparent plastic film (such as cling film, or two clear shower cups); then apply a suitable glue.

In the event of loss of adhesion, the glue can be reapplied several times.

In addition to using only glue, or glue and attractants on it, Sfera Trap can also support insecticides and pheromones.

Practical advice: Use disposable gloves in the preparation of the sphere and the various products used. To avoid damage from possible spillage of glue, place a protective sheet underneath the sphere, such as cardboard or paper. In the eventuality of glue spillages these can be removed using white spirit or turpentine.

£29.13

JAR NOT INCLUDED

B. Hornet and Wasp Trap - FOR GLASS JAR

This trap is a newly marketed trap for catching harmful insects, also designed with in mind the need and benefit of recycling common containers.

Can be screwed onto recycled 1kg (2lb jar) glass honey jar (NOT INCLUDED)

Made of tough plastic material and consists in two parts: a funnel, to be positioned on the top of the jar (so as to prevent captured insects from flying out) and a lid which screws onto the jar (so as to protect the bait from rain) and has 6 regular gaps (so as to let the insects in).

Can be hung on tree branches or other supports, or it can be placed on a shelf or on the ground. Its stylish shape and flat base make this trap particularly suitable for outdoor spaces such as gardens, camping sites, terraces and boats.

It offers yet another effective and environmentally friendly solution to attracting insects: a solution which is harmless to people, pets and good insects.

each £2.60
per pair £4.90

BOTTLE NOT INCLUDED

C. Hornet and Wasp Trap - FOR PLASTIC BOTTLE - Designed to fit on a standard plastic bottle.

"the top-trap" has been used successfully for many years, both nationally and internationally, for controlling flying pests in orchards, vineyards and all kind of farming.

It is made of tough, durable plastic material. Hooked onto a recycled plastic water bottle (filled with half a litre of bait mixture) and hung on branches of the plants to be defended, this trap becomes an economical, effective and environmentally friendly bio trap.

each £2.60
per pair £4.90

D. Wasp Trap

Fill with a sticky sweet liquid and the wasps will enter the trap via the hole in the bottom, once inside they will try to leave through the clear lid and then perish.

£7.86

E. 2lb (1kg) Glass Jar for our Hornet & Wasp Trap

Please note: Glass Jars are sent at the consignees own risk. We regret neither ourselves or the carrier will take responsibility for breakages.

K. Eversafe Bee Care and Hive Wash

Formulated for the complete bee and honey production environments including poly hives. This concentrated cleaner sanitiser is a powerful tried and tested bactericidal, virucidal and fungicidal product.

A brand new concept for beekeepers that will keep equipment, tools, hives and bee wear safe to use, hygienically clean and disease free.

Safe to use on poly hives. Will not degrade, stain or damage any water washable surface.

Only to be used for cleaning.

Spore forming bacterium such as Nozema, Chalkbrood and American Foulbrood are all fungicidal diseases of honey bees. Streptococcus pluton is a bacterial infection that causes European Foulbrood in honey bees. When used at the correct concentration Hive wash is highly effective against moulds and yeasts. Typical pathogens such as E. Coli, Listeria, Campylobacter and Salmonella are eliminated when these concentrations are adhered to. Prevents cross contamination and the spread of disease.

Per box (2.5kg x 5)	£30.91
50kg carton (4 boxes)	£107.30
Pallet (64 boxes)	£P.0.A

B. Dulcofruct Bee Candy (Solid Energy Supplement)

This product DULCOFRUCT mark has been tested for the last two years before it was placed on the market. It was specially made to ensure bee feeding in the cold season.

DULCOFRUCT candy is a 100% inverted product that offers the bee the possibility of a smooth digestion, the bee maintaining its energy. The product is extracted from maize (NON GM) that has in its composition: fructose, glucose, other sugars, water and a dry substance of max. 84%.

DULCOFRUCT candy has a creamy consistency (can be easily cut with a knife) and can be easily digested by the bees, being solidified so it doesn't melt in the hive.

Advantages of using this product:

- Inverted Product 100% – Doesn't Wear Out The Bees
- Low pH – Prevents Nosema Apis
- Ergonomic packaging – favors easy handling
- Creamy consistency – easily assimilated by the bees
- Successfully used in beekeeping for 5 years now!
- High on fructose!

1kg bag	£2.00
10kg box (10 x 1kg)	£18.85

C. Dulcofruct Bee Candy With Plant Extract

The products was created to ensure the bees feed in the cold season, with the benefits of natural plants, that can be found in the composition of this product: thyme, chamomile, nettle, peppermint, yarrow, St. John's worth, calendula, lemon balm, basil, wormwood.

Administration mode:

- To be used as bee food during the cold season
- To be placed above the frames in the hive

Advantages of using this product:

- Inverted product 100% – doesn't wear out the bees
- Contains 10 plants – improves the immune system of the bees
- creamy consistency – easily assimilated by the bees
- Low pH – Prevents Nosema Apis
- Over 300.000 bee families feed in Romania and abroad.
- High on fructose!

1kg bag	£2.20
10kg box (10 x 1kg)	£20.67

D. Dulcofruct Bee Candy With Thymol

This product DULCOFRUCT mark has been tested for the last two years before it was placed on the market. It was specially made to ensure bee feeding in the cold season.

Dulcofruct Thymol candy is the perfect bee feeding solution in the cold season, because of the thymol content it helps the bee families to fight against the Varroa mite, easily assimilated by our little friends, also being a 100% inverted product without wearing off the bees in the digestion function.

Advantages of using this product:

- Thymol content – helps the bees fight against the Varroa Mite
- Antiseptic properties – helps the immune system of the bees
- 100% Inverted – doesn't wear out the bees in the digestion process
- Ergonomic packaging – saves time in making/handling the food.

1kg bag	£2.20
10kg box (10 x 1kg)	£20.67

E. Dulcofruct Bee Candy With Vitamins and Proteins (Pollen Substitute)

This is a feeding product for bees that is administered after the bees come out for its cleansing flight, being rich in B type vitamins (B1, B2, B6, B12) and the much needed vitamins that help with growth and development (vitamins: PP, C, H and Calcium Panthotenate) amino acids (Methionine, lysine, cysteine, threonine, tryptophan) and minerals (calcium, magnesium, sodium, phosphorus, selenium, copper, iron, zinc, manganese).

This candy ensures a high – protein feeding, based 100 % invert active monosaccharaides (fructose and glucose).

Advantages of using this product:

- low ph – prevents nosema apis
- inverted product 100% – doesn't wear out the bees
- creamy consistency – easily assimilated by the bees
- Over 300.000 bee families feed in Romania and abroad,
- High on fructose!

1kg bag	£2.90
10kg box (10 x 1kg)	£26.02

F. P.I.D.A Bee Candy

Ingredients:- Sugar, Glucose Syrup and Sterilised Water.

2½kg	£6.26
20kg box (8 x 2.5kg)	£45.00

G. Dulcofruct Bee Candy (Super Protein Candy)

This product contains 20% ApiPollen Substitute, with a perfect carbohydrates balance (fructose, glucose, sucrose), also with a high protein content (raw protein 10%) that assures the explosive development of the bee family. It represents the complete solution between nectar and pollen. Contains probiotic that helps for the perfect assimilation of protein and the hole ensemble of microelements that are needed for the fast development of the bee family's power.

Administration mode: To be used as food in the spring, after the cleansing flight, and in the autumn for forming the fat body and to prepare the bee colonies for the winter period.

B. Dulcofruct Liquid Bee Syrup

Is recommended in feeding the bee families in the harvesting free period.

To be used for stimulating the bee's families and to refill the food reserves (hot season).

This product DULCOFRUCT mark has been specially created to ensure the bees a stimulating feeding, without containing any kind of sugar.

DULCOFRUCT – supplement- doesn't crystallize in time, eliminating the risks of solidification and can be kept/stored at any temperature away from the direct sunlight (max.50°C)

The shelf life of the product is 12 months from the date of production.

Advantages of using this product:

- inverted product 100% – doesn't wear out the bees
- no crystallization in time – eliminates the risk of food solidification
- ergonomic packaging – favors easy handling
- premium quality – doesn't create the phenomenon called "robbing" between bees
- Successfully used in beekeeping for 5 years now!
- High on fructose!

O. Mesh
used for making your own open
mesh floors, travelling screens
or repairing old lids, both in
sizes 18" x 18" squares.

Galvanised **£4.61**

S/Steel **£13.34**

**P. Stainless Steel Uncapping
Fork (Cranked)
with plastic handle**
see item F. **£11.76**

Q. Frame Cleaner
for cleaning the groove in your
side bars when
re-waxing old frames **£6.05**

R. Wire Excluder Cleaner
for easier cleaning of wire
queen excluders **£10.40**

S. S/Steel 'Claw' Hive Tool
210mm Long **£12.60**

T. S/Steel 'Amy' Hive Tool
185mm Long, 26mm Wide
(Scraper End) **£10.50**

U. S/Steel 'Z' Hive Tool
£5.00

V. Uncapping Fork Slicer
£10.95

Parts & Accessories inc. VAT

A. Heavy Jute Quilt

this heavy jute can be cut to any size you require, we ourselves use this product on our bees as it is easy to peel one corner to look into the hive and also easy to cut a small feed hole in the centre.

£3.20

B. Glass Quilts

a simple device which lets you look into the hive to see how your bees are doing and can also be used as a clearer board, supplied with a hole to take a porter bee escape

National, Commercial & W.B.C.

£18.45

C. Polycarbonate Quilts

in National, Commercial and WBC, plain or with a hole for a porter bee escape, hundreds of times stronger than glass, offers better insulation & will not cause condensation.

plain

£19.38

with hole

£20.02

D. Plastic Queen Excluder

very strong and virtually indestructible. Available in 3 sizes with round edges so the bees don't damage themselves while moving around the hive.

National, Commercial & Langstroth

£5.95

E. Wired, Unframed Queen Excluder

this enables you to make your own frame if you should wish but they are designed to go straight onto the hive.

National, Commercial & Langstroth

£10.97

F. Wired, Framed Queen Excluder

the round wires are accurately spaced in a metal frame, secured into a wooden frame, rounded wires ensure no damage is caused to the bees.

National, Commercial, W.B.C.,

MD, Langstroth & Smith

£19.57

G. Slotted Steel Queen Excluder

this is the queen excluder we use ourselves, made from a galvanised sheet stamped with our own tooling.

National, Commercial & W.B.C.

£8.57

H. Crown Boards (inc. Porter Bee Esc)

made from 6mm exterior ply and then framed with redwood batons, available in all sizes.

National, Commercial, W.B.C.,

MD, Langstroth & Smith

£14.91

I. Rhombus Clearer Board

our preferred method of clearing our bees, a simple 6mm plywood board in a wooden frame with a large hole drilled centrally with a rhombus escape, no moving parts so there is nothing to be clogged by the bees.

National, Commercial & W.B.C.

£15.75

J. Propolis Screen

It is easy to gather propolis using this plastic mesh, place on top of your bee hive then add the 4 ventilation strips and put your roof back on, the bees will feel the draft from the strips being in place thus making the bees propolise the plastic screen, place screen in deep freeze for a minimum of 12 hours then take out roll up and propolis will drop off.

National, Commercial, WBC, Langstroth, M.Dadant & Smith. £2.63

K. Insulated Quilt

20mm thick and made from recycled foam, fits inside an eke, super or brood chamber to help keep your bees lovely and warm, available in all hive sizes, National, Commercial, WBC, Langstroth, M.Dadant & Smith.

National, Commercial & W.B.C, Langstroth, M.D & Smith.

£2.70

L. Stainless Steel Queen Excluder (National & Commercial Only)

£9.77

M. Snelgrove Board

an ingenious invention that helps stop your bees from swarming.

National & Commercial £39.15

N. National 14x12 Eke

a cedar wood extension piece that fits underneath a standard national brood chamber providing extra depth to take 14 x 12 frames

In Flat £26.75

Made Up £34.98

O. S/Steel Frame Rest

totally made of stainless steel and holds 3 frames comfortably.

National, WBC, 14x12, Langstroth, M.Dadant £20.20

P. Stainless Steel Economy Frame Holder

holds 3 frames comfortably

£10.24

Q. Traditional English Skep

a straw bowl which is used for collecting swarms.

£79.79

R. Skep with Entrance

a straw bowl which is used for collecting swarms.

£36.75

S. Pollen Trap (National only)

Pollen trap attaches to hive using the hooks supplied, the bees crawl through the plastic pollen mesh which removes pollen from their legs, this falls through a stainless steel grid into the plastic collection tray

£33.18

T. Disc Entrance NEW DESIGN

A simple plastic disc with four positions.

1. Open 2. Queen Excluder 3. Closed but with Ventilation. 4. Totally Closed. Comes in Green, Red, Yellow, Blue & White

each £0.58

(over 10+) each £0.51

U. Cone Escape

cone used for a W.B.C or gabled roof.

each £0.62

V. Canadian Cone Escape

cone shaped for use in different types of clearer boards.

each £0.62

(over 10+) each £0.52

W. Pollen Screen (National only)

£1.94

X. Pollen Basket (National only)

£3.28

Y. 8 Way Bee Escape

simply put the board escape side down, under the super to be cleared

each £2.36

Z. Porter Bee Escape

a plastic escape which has plastic springs inside which lets the bees pass through but are unable to return.

£1.25

ZA. Rhombus Escape

a simple diamond shape escape made of plastic with no moving parts.

£2.40

A. Travelling Screens

available in National and Commercial, a redwood frame with perforated galvanised mesh stapled to it gives the full hive ventilation.

£19.64

B. Metal Roof Covers

available in all sizes and made of galvanised steel.

Nat, Comm & Nucleus £9.79

W.B.C. & Gabled (per Pair) £15.13

Lang, Smith & MD £9.79

C. Hamilton Converter

This will turn a National brood chamber in to a 10 frame Commercial made from western red cedar.

Cedar Flat £8.24

Cedar Assembled £12.31

D. Travelling Box – BS Only

a simple plywood box with plenty of ventilation used for taking swarms or making up nucleuses on site.

£39.58

E. Mouse guards

a simple perforated metal strip which can be easily applied to the front of your bee hive.

£1.16

**F. Metal Frame Runners
Per Pair**

Available in Nat, Comm, WBC, Lang, MD & Smith

£1.54

G. Frame Spacers

Castellated (per pair)

Nat slot 9,10,11 £2.62

W.B.C. slot 8+10 £2.62

H. Observation Hive

comes complete with ¼ gallon contact feeder & shutters, will hold 1 brood frame & 2 super frames (frames and feeder not included) has a central pivot point in place for turning the observation case & an external entrance & comes complete with two double glazed units. This item is made of mahogany

£261.25

I. Translucent Tube

to be used with our observation case, the internal bore is 19mm and is suitable for fixing to the plastic pipe of the Observation hive and allows flexibility when positioning the unit.

per metre £7.35

Dimensions: 5ft (L), 18" (W), 19" (H)
and made from 1³/₄" x 3³/₄" timber.

J. National Six Comb Nucleus (Cedar)
western red cedar with a galvanised metal roof cover, with space within the roof to accommodate ½ gallon contact feeder. Comes with solid floor, brood chamber, crown board and roof.

standard flat	£120.30
standard assembled	£141.54
14 x 12 flat	£137.72
14 x 12 assembled	£166.63

K. Soda Crystals
Ideal for removing propolis and wax from hive tools, smokers, gloves, bee suits, especially poly hives...Totally bio-degradable and comes in 1kg bag.

1kg Bag	£1.50
10kg Bag	£10.00

L. Hoffman Converter Clips
a simple plastic clip which clips to the top of a DN1 and SN1 side bar to give the perfect Hoffman spacing.

Bag of 50	£5.25
Bag of 100	£10.26

M. Narrow Ends, Plastic
green, red, yellow, blue & white, with spacing of 1⁷/₁₆".

10	£1.22
50	£5.65
100	£10.21

N. Wide Ends, Plastic
white only with spacing of 1⁷/₈".

10	£1.31
50	£6.20
100	£11.11

O. Double Hive Stand (Assembled Only)
is made of treated timber, can accommodate two hives and has collapsible legs.

GRANULATED HONEY

All pure honey will granulate or become solid in cool weather, and this condition is, in fact, the best proof of its quality. It can be easily restored to the liquid state by standing the jar in hot water, first loosening the cap. The heating of the water should continue until the honey becomes liquid. The jar should stand on strips of wood so that there is water below as well as around the jar. To microwave, remove lid and select low power and stir occasionally until clear.

GRANULATED HONEY

All Pure Honey will granulate or thicken; in fact this change is the best proof of its quality. It can easily be restored to the liquid state by either of the following methods:
(1) Loosen the top and stand the jar in hot water, preferably on strips of wood so that the water completely surrounds the jar. Heat very gently until the honey becomes liquid.
(2) Remove metal cap or loosen plastic cap and place in a microwave oven on the lowest power. Remember, the honey in the centre of the jar will continue to become liquid after the heating time has finished.

Maisemore Apiaries Ltd

Professional beekeepers, manufacturers and retailers est.1953

MAISEMORE APIARIES LTD Old Road, Maisemore, Gloucester GL2 8HT

Directions

When you get to the village of Maisemore go past the public house called The White Hart Inn on your right, approx 300 yards on the right is a nursing home called Deanwood Lodge, turn into Church Road. When you get to the Church bear left and follow the road until you meet the cross roads, go straight over. You will climb uphill for approx 3/4 mile. When you drop down into the bottom you will find Maisemore Apiaries car park on the left and the shop on your right.
